

# UNLOCK THE POWER OF AI AND DATA

## Platform Modernization with Ntirety Data Services

### Are you at an AI crossroads?

As businesses look to deliver new forms of AI-powered innovations, outdated and ill-equipped data foundations impede adoption, stall progress, and prevent investments from reaching their full potential.

### Common data challenges

Existing system constraints

Siloed and fragmented data

Legacy environments

Insufficient skills or resources

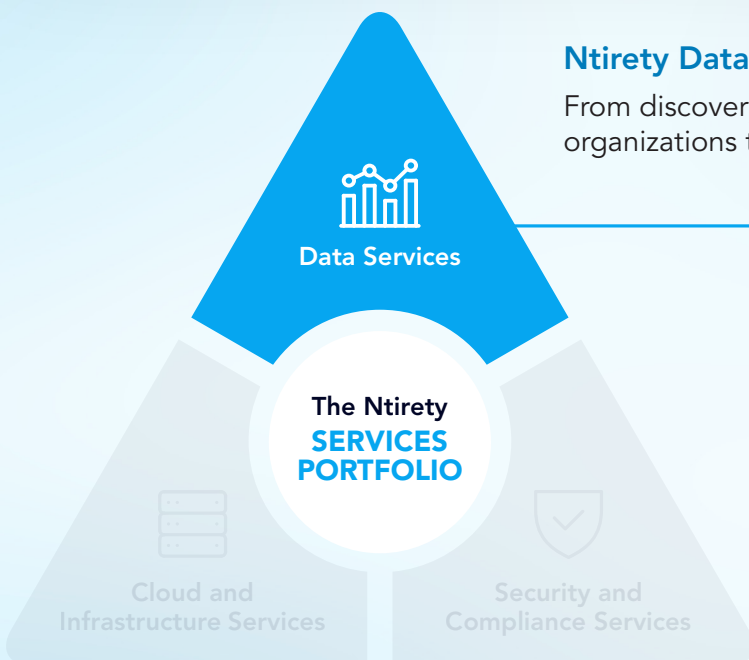

**60%**   
**OF ORGANIZATIONS**

face significant data and infrastructure gaps when supporting AI\*

\*ESG, Enterprise Infrastructure for Generative AI: A Foundation for Success, Jun 2024

### Turn data visions into realities

To harness the power of AI, organizations need trusted partners and proven solutions. With Ntirety Data Services you can assess, govern, and transform existing data systems into a holistic, secure, and AI-ready platform.

### Ntirety Data Services

From discovery to implementation, our expert-led services guide organizations to unlock business innovation and AI adoption.

#### Define business goals and target state

Analyze data landscapes, AI readiness, and go-forward strategies

#### Rework existing service delivery solutions

Modernize data platforms and optimize processes

#### Evolve operations and unlock innovation

Accelerate AI initiatives, data-driven decision-making, and operations

## Ntirety Data Readiness Engagements

Platform modernization isn't one-size-fits-all. Ntirety Data Readiness Engagements combine curated best practices, proven processes, and industry-leading Data Services to create the data platform your business needs.

### DISCOVER, ASSESS, PLAN

Data Assessment

The discovery and assessment of an organization's data estate across key cost, performance, and security criteria. This includes determining the current state of data, how it can be used, future requirements, and infrastructure needs required to support business initiatives.

### BUILD, DEPLOY, TRANSFORM

Data Engineering

The alignment and application of technical resources to create secure, performant, scalable, and manageable data architectures. This covers data aspects such as pipelines, cloud data stores, data management platforms, and data ecosystem integrations.

### OPTIMIZE & MANAGE

Managed Services for Data Solutions

The continuous operation of data solutions to improve performance, resiliency, optimization, and efficiency. Services include managed data lakehouse, managed databases, managed data mesh, and managed data architecture offerings

#### SPOTLIGHT

#### Ntirety Managed Data Lakehouse

Ntirety Managed Data Lakehouse, part of Ntirety Managed Service for Data Solutions, provides a unified repository for disparate data stores, ensuring consistent, fast, and efficient access to insights. It offers a modern, flexible architecture to support data access and analytics solutions including BI, AI/ML, and other reporting systems.

### Is your data ready to deliver?

For decades, Ntirety has solved the toughest data problems and regulatory needs in our customer's preferred environments. With deep expertise, we deliver the processes, solutions, and services to seamlessly integrate and optimize your most valuable asset—your data.
